

Replimune to Provide Data Update on June 3, 2020

April 30, 2020

WOBURN, Mass., April 30, 2020 (GLOBE NEWSWIRE) -- Replimune Group Inc. (NASDAQ: REPL), a biotechnology company developing oncolytic immuno-gene therapies derived from its Immulytic™ platform, today announced it will host a conference call to provide updated data from patients with melanoma and non-melanoma skin cancers treated with RP1 combined with Opdivo® in its ongoing Phase 1/2 clinical trial. The investor event will be held on June 3, 2020. The Company will not be presenting data at the ASCO Annual Meeting this year, which has transitioned to a virtual format. The Company will provide additional details on the event at a later date.

About Replimune

Replimune Group Inc., headquartered in Woburn, MA, was founded in 2015 to develop the next generation of “oncolytic immune-gene therapies” for the treatment of cancer. Replimune is developing novel, proprietary therapeutics intended to improve the direct cancer-killing effects of selective virus replication and the potency of the immune response to the tumor antigens released. The Company’s Immulytic™ platform is designed to maximize systemic immune activation, in particular to tumor neoantigens, through robust viral-mediated immunogenic tumor cell killing and the delivery of optimal combinations of immune-activating proteins to the tumor and draining lymph nodes. The approach is expected to be highly synergistic with immune checkpoint blockade and other approaches to cancer treatment. Replimune intends to progress these therapies rapidly through clinical development in combination with other immuno-oncology products with complementary mechanisms of action.
