

Replimune to Present at the SVB Leerink 10th Annual Global Healthcare Conference

February 18, 2021

WOBURN, Mass., Feb. 18, 2021 (GLOBE NEWSWIRE) -- Replimune Group, Inc. (NASDAQ: REPL), a biotechnology company developing oncolytic immuno-gene therapies derived from its Immulytic™ platform, today announced that Philip Astley-Sparke, Chief Executive Officer of Replimune, will present at the SVB Leerink 10th Annual Global Healthcare Conference being held virtually on Wednesday, February 24, 2021 at 8:40 AM ET.

A simultaneous webcast will be available in the Investors section of Replimune's website at www.replimune.com. A replay will be available for approximately 90 days following the conference.

About Replimune

Replimune Group, Inc., headquartered in Woburn, MA, was founded in 2015 to develop the next generation of oncolytic immuno-gene therapies for the treatment of cancer. Replimune is developing novel, proprietary therapeutics intended to improve the direct cancer-killing effects of selective virus replication and the potency of the immune response to the tumor antigens released. Replimune's Immulytic™ platform is designed to maximize systemic immune activation, in particular to tumor neoantigens, through robust viral-mediated immunogenic tumor cell killing and the delivery of optimal combinations of immune-activating proteins to the tumor and draining lymph nodes. The approach is expected to be highly synergistic with immune checkpoint blockade and other approaches to cancer treatment across a broad range of cancers. Replimune intends to progress these therapies rapidly through clinical development in combination with other immuno-oncology products with complementary mechanisms of action as well as in standalone indications.
